Worldwide service

3

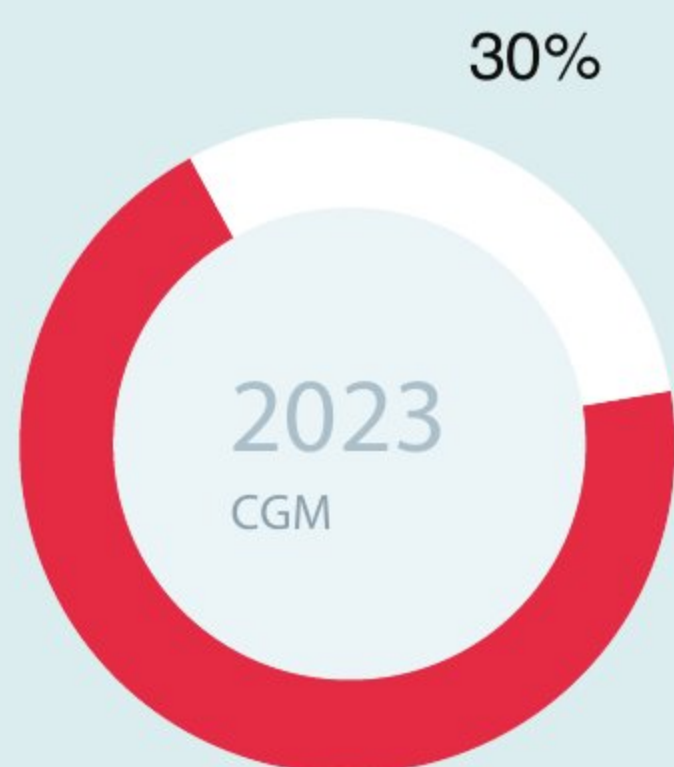

Scope of Services

LOGISTICS

Logistics involves but not limited to movement, storage, handling, packaging, transiting, tagging, stowing, customs and receipting.

FREIGHT

Is the commercial activity of classifying, identifying shipping and handling from point to point for the shipper.

* Logistics forms the heart of our operations

Logistics is generally the detailed organization and implementation of a complex operation. In a general business sense, logistics is the management of the flow of things between the point of origin and the point of consumption to meet the requirements of customers or corporations. (Wikipedia).

Logistics digitization has emerged as a competitive environment. During the Covid19 pandemic, the use of advanced technologies became even more relevant. This is partially explained by increased demand for online purchases and a much greater load on the logistics system. By observing and adopting useful technologies and practices are at the forefront of Owins.

Digital freight and records is one of the directions Owins will be pursuing. This will help streamline records, have one central repository and record that is viewable by the customer and Owins. Using a modular system to surge resources such as warehouses, talent or those involved in the logistics ecosystem as partners or fulfilling a role such as customs officials.

Relationships are important to ensure that we have touch-points at all levels necessary to ensure the efficient, safe and accountable handing of freight.

#1

OUR VISION

To be the preferred shipping company *providing exemplary service by fulfilling clients' expectations above the industry standard* through utilizing innovation, technology & talent to develop unique & sustainable logistics solutions.

#2

MISSION STATEMENT

Exceed our clients' expectations through unique freight and logistics solutions that leverage innovation, technology and a talented work force.

#3

OUR COMMITMENT

Integrity, excellence and professionalism as a stalwart cornerstone that transcends time and hinges on our vision. This drives our dedication to uphold ourselves to the highest code of ethics and morals both at a personal and organizational level.

OUR SERVICES

5

● GLOBAL SERVICE

We have a network that is connected to technology, talent, material and intellectual resources, that comprises of a global network of agents.

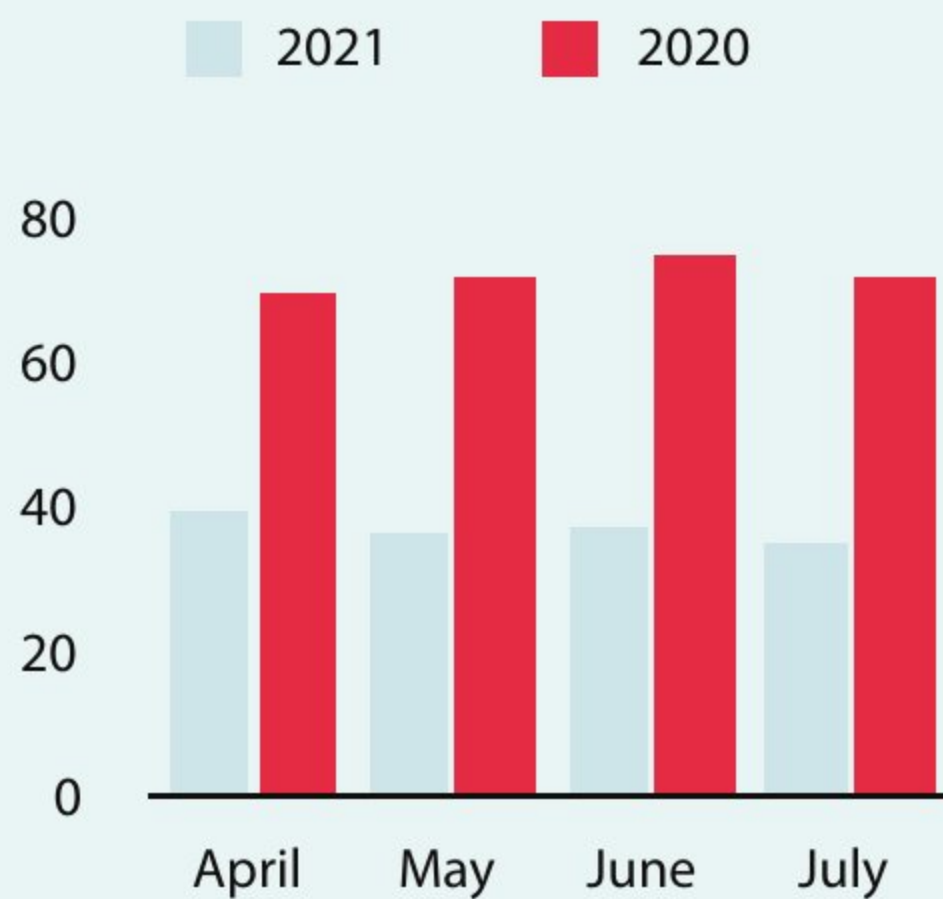

NEW SERVICES

1. **PET RELOCATION SERVICES:** Pet relocation is an important service that many destination or long-term travelers, or even those who rely on their services such as service dogs. Also it could be for other reasons such as relocation of endangered species, movement of the animals to a more conducive environment or shelter or for whatever reason that guarantees their safety during their entire process from receiving, preparation for the relocation to the arrival of their new domicile. Our services cover ground to air transportation and help coordinate other required items such as required shots and having a medical passport that is up to date and complies with the rules and regulations of the destination location
2. **HORSE RELOCATION SERVICES:** Our services include regional and to international destinations. The process is as animal friendly as possible and we prepare the horses for the journey which involves meeting all health shots and requirements for the destination location as well as their wellness and nutrition during the transit period between the ports and handling facilities and containers before, during and after arriving at their destination. We work with the best in the industry and prioritize their movement to minimize the impact of travel to the horses during transit.

Business News

* Schedule Reliability % based on Ocenia, Trans-Pacific, Asia-North Europe & Asa-North America markets

* This looks at the numbers as of beginning of 2022. Source: Sea Intelligence, DHL

SCHEDULE RELIABILITY

schedule reliability can loosely be defined as the probability that vessels arrive and depart on time as compared to the pro forma schedule published by the carrier.

Shippers and logistics service providers face frequent vessel changes due to increased slow steaming, shifting port coverage, vessel diversions, and service changes. Contract holders want to measure carriers' performance so that they can select the best carriers and routes to meet their business needs. CargoSmart provides interactive schedule reliability reports by trade, port pair, service, and carrier to support customers' decision making processes for carrier contract management.

Schedule reliability is an essential factor for operational planning and execution. Having a reliable schedule ensures merchandise to be available at the destination as per the agreed delivery dates between the shipper and consignee.

It is estimated that the absence of reliable schedules can lead to an addition of more than 60% to the cost of inter-modal transport. The real cost of the total supply chain for simple supply chains may also more than double.
